Fig. 3B

Fig. 3B is a perspective view of the assembly in a disassembled state. The upper part (2) is being pulled out from the lower part (P). A dashed line L1 indicates the vertical axis of movement. A curved arrow indicates rotation. The lower part (P) is shown as a circular disc with a central protrusion. The upper part (2) is a cup-like structure with a dashed line indicating its internal profile. The label "pull out" is next to an upward arrow. The label "join" points to the interface between the two parts. The base (30) and its layer (31) are shown at the bottom.
